Special Fair Use Permission

If you want to use a single figure, a brief paragraph, or a single table from the *GCAGS Journal* in a paper in another publication, GCAGS considers this to be fair usage, and you need no formal permission. In that case, you should print a copy of this document and present it to your publisher. You are, however, required to provide proper citation (see Condition of Grant of Permission below). Permission for more extensive reproduction of GCAGS material can be requested from the Executive Director or Managing Editor (see www.gcags.org).

Condition of Grant of Permission

As a condition of the grant of permission contained under the **single use only or multiple item usage**, GCAGS requires: 1) a full citation in your bibliography for each GCAGS publication from which a table or figure or text is taken; and 2) a statement or citation in figure and title captions, including a) the author name(s) and year of original publication, followed by b) an appropriate phrasing acknowledging the granting of permission (e.g., “*reprinted by permission of GCAGS*” or “*courtesy of GCAGS*.”

Cover: The USGS bottomhole temperature correction method was compared to other prominent empirical methods available in the literature. The effect of depth variation was studied for each method. Results indicate the USGS method is most applicable to the onshore Gulf Coast because it is calibrated using data from this region. For more information, please see Burke et al. paper herein.
